Summary: Forty years experience with a wide range of technical, managerial and negotiating skills largely applied to engineering and manufacturing projects within nuclear and other advanced weapons programs. Have developed close working relationships within the DOE, other government agencies, SNL, LANL, and foreign labs. Formerly "Q" cleared. Retired since 2007.

Employment History:

1994 to 2007 Honeywell Federal Manufacturing and Technologies (Kansas City Plant). *Program Management Specialist*. Responsible for negotiating and managing work for NM laboratories and the DOE. Managed KCP Stockpile Stewardship work in support of LANL's APT, DARHT and ATLAS programs. Managed a variety of work in support of SNL. Managed NA-42 Emergency Response support. Managed NA-24 project requiring multi-year interface with Russian scientists at their institute. All project/program work required the use of reporting and presentation skills. Responsible for the maintenance and application of ISO 9001 project management processes to KCP NM.

1977 to 1994 EG&G Energy Measurements Inc. *Section Head (1979-1994)*. Negotiations for and management of special-purpose mobile equipment projects. Managed the activities of 40 professional and hourly employees. Projects included engineering, design and fabrication of unique instrumentation trailers, vans, and shelters for SNL and LANL which supported underground nuclear tests as well as missile and aircraft evaluations. Established EG&G as the design and manufacturing agency for DOE/TSD nuclear shipment escort vehicles as well as secured maintenance and modification work for their SNL-designed tractors and trailers.

Technician (1977-1979). Supported SNL with evaluations of advanced intrusion detectors. Developed computer-driven intruder simulators. Prepared and published reports documenting testing techniques and results. Provided assessment services to DOE and nuclear industry sites for security upgrades.

1976 Collins Construction Inc. *Foreman*. Directed and participated in the construction of commercial buildings.

1975 to 1976 Wyoming Services Inc. *Co-Owner*. Development and management of a business offering automotive repair, tire sales and electronic repair services.

1970 to 1975 General Dynamics Corp. *Supervisor*. Provided modification and systems operation services to AEC nuclear readiness and USAF Weapons Laboratory laser weapon test aircraft. Supervised, scheduled and assured quality of supporting shops. Airborne duties included maintenance and operation of on-board equipment.

1966 to 1970 United States Air Force. *Structural Repairman*. Supervised and performed structural and hydraulic maintenance and prototype modification on a wide variety of aircraft assigned to the USAF Weapons Laboratory.

Education, Certification, Training

BA – Management, University of Phoenix, 1990

Over two years toward BS in engineering, University of NM

Electronics Technology Certificate, Devry Institute, 1978

Structural Repair and High-Performance Aircraft Repair, USAF, 1966

Aircraft electrical systems, air conditioning and machining, General Dynamics, 1970 – 1972

ISO 9001

Six Sigma

Project Management Professional, 2003 (certification has lapsed)
